

I really enjoy the whole XM radio experience, its really nice to turn on the radio and get exactly the type of music that I want to listen to with no commercials and being able to listen to it any place in the US. I have been looking forward to the Traffic and weather reports on XM for the San Diego Area, I see no reason for anyone to remove this option from a paying customer, this is why I pay so I dont have to listen to 5 to 6 minutes of commercials with other things thrown in for good measure just to get 6 minutes of music. Leave things the way they are. All of the XM users out there like this service.

Thank you for your time.

Ken
